

Please read this guide before completing the Online Configurator for Comark Kitchen Checks PRO to make your on-boarding experience smoother and easier.

Click on this link to get started <https://configurator.comarkinstruments.net/>

Notes:

- At any time and on any page during this process, click on the Tutorial Buttons for context help
- It is recommended that the Online Configurator be accessed via a PC or Laptop and not the Device you intend to use the system with

Instructions

Register as a User

The screenshot shows the registration page of the online configurator. At the top, a dark blue banner reads "WELCOME TO YOUR CONFIGURATOR". Below this, the page is split into two sections: "ARE YOU A NEW USER?" on the left and "ARE YOU A RETURNING USER?" on the right. The "NEW USER" section includes a "Country" dropdown menu currently set to "UNITED STATES", radio buttons for "Monitor System" (unchecked) and "HACCP System" (checked), an "E-mail" field with "marketing@comarkinstruments.com", and a "Password" field. The "RETURNING USER" section includes an "E-mail" field with "email@domain.com" and a "Password" field. At the bottom, there are "START" and "LOGIN" buttons. Three callout boxes with arrows point to specific elements: Box 1 points to the "Country" dropdown; Box 2 points to the "HACCP System" radio button; Box 3 points to the "START" button.

1. Select Country. This section is geo-located on your IP. Select from the drop-down menu if this is not correct.

2. Select HACCP System and enter your email and password. (The 'Monitor System' is coming soon).

3. Click Start.

The first user entered is the Admin User for the Account, or Account Holder. The email and password entered now will be used to log into this configurator and the dashboard to review your results.

Enter/Confirm your Basic Information

1. Check details. Check that the correct country and temperature scale are selected.

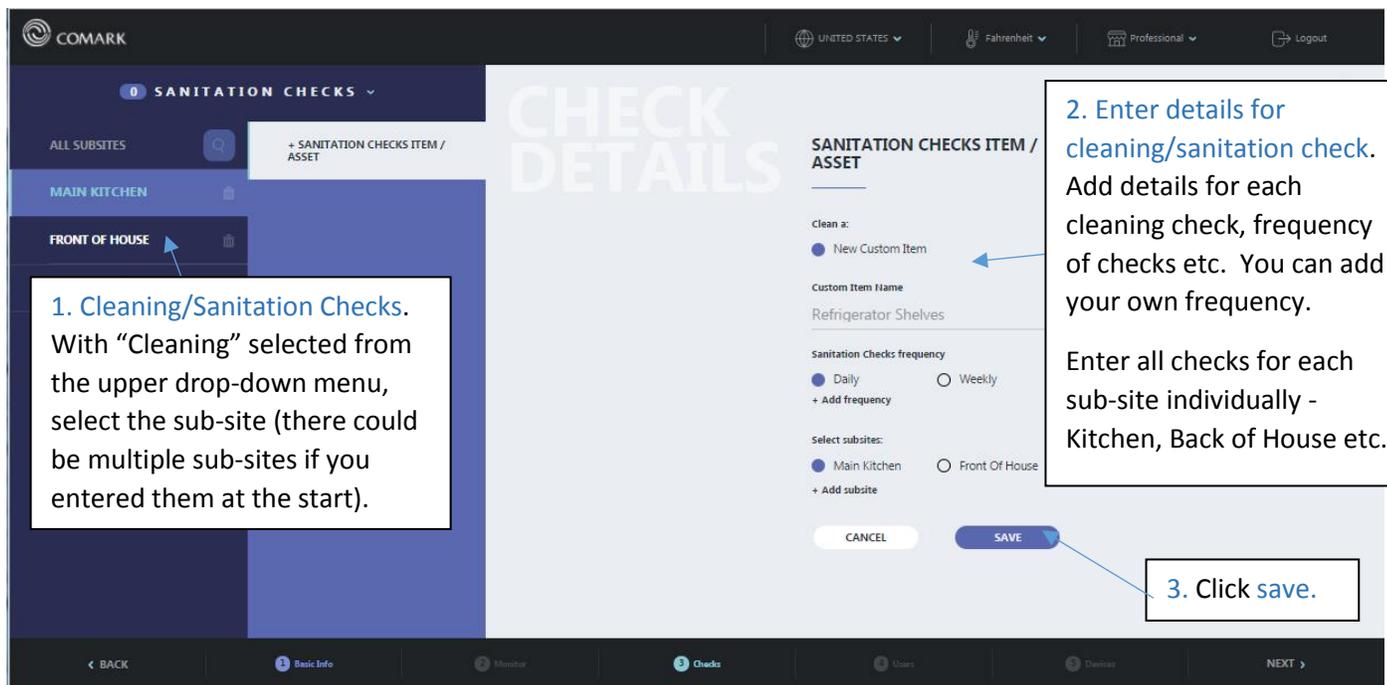

2. Enter information. Enter company and site/store details. Enter sub-sites/area – these are areas where food is stored, prepared or held, e.g. Main Kitchen, Function Room Kitchen, Back of House etc.

3. Click Next.

Notes:

- If you already have Bluetooth Pocketherm probe you must select the correct scale, for example BT250KC is °F and BT125KC is °C. Selecting the Correct Scale is very important.
- Scale will also auto-select depending on Geo location, so USA/North America is set Fahrenheit and UK/EU will default to Celsius.
- It is not possible to mix and match BT125KC and BT250KC on one account.
- If you have two or more Bluetooth Pocketherms to setup, please refer to Appendix 1, ([click here](#)). Use the 'Click Here' link to request that your account be upgraded and that you agree to the additional costs. Then continue with the setup process. You can return later to add the additional Tablets to the Account when you receive your upgrade notification.
- You may add up to 5 Subsites for the Professional Account. If you wish to add more then please refer to Appendix 1, [click here](#) for details on the upgrade options.

Adding your Sanitation Checks

Notes:

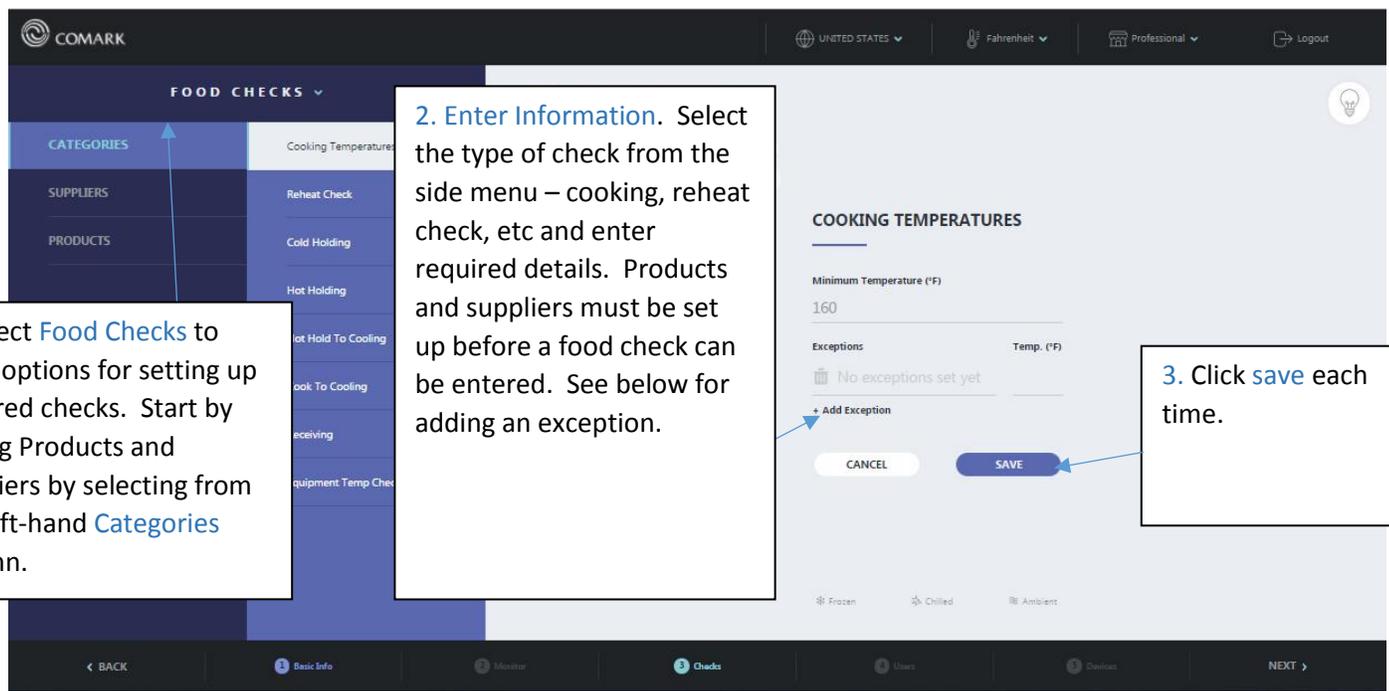

- There are no limits to the number of Cleaning or Sanitation checks that can be added to the app.

IMPORTANT – Do not CLICK NEXT after completing your Cleaning/Sanitation checks.

Adding Food Checks

Use the drop down at the top left of the screen to select 'Food Checks'. This will take you to the 'Food Checks' page.

Adding a Single Food Check

Adding Multiple Food Checks

1. Food Checks. Entering multiple food checks is easier using a CSV file. A template can be downloaded (Download Sample Button). You can use this to create your own file to upload (Upload CSV Button).

DOWNLOAD BELOW A SAMPLE CSV FILE TO ADD SUPPLIERS AND PRODUCTS. THE FIRST 3 ROWS ARE SAMPLE DATA, MAKE SURE TO REMOVE THEM AND THEN UPLOAD THE FILE WITH YOUR PRODUCTS AND SUPPLIERS. YOU CAN USE Y/N OR 1/0 TO SPECIFY IF THE PRODUCT IS AMBIENT, CHILLED OR FROZEN (MULTIPLE STATE IS ACCEPTABLE, SO A PRODUCT CAN BE BOTH AMBIENT AND CHILLED ETC).

DOWNLOAD SAMPLE CSV

UPLOAD CSV FILE

The CSV file for uploading multiple items can also be found in Appendix 2 at the end of this document ([Click here](#)).

Notes:

- Re-visit food checks as necessary to add more products and suppliers or edit/delete. You can also add another list by with a new CSV upload.
- Don't add the same products more than once as you will end up with duplicates in the list and on the app.
- There are no limits to the number of food items that can be added.

Add Exception Temperatures (Optional)

If you click 'Categories' menu item you will be presented with a list of Food Categories

The list of Food Categories has temperatures associated with them that are pre-programmed to match the local requirements in your Country/Region. However, they can all be edited if your own rules over-ride these.

You can also add exception temperatures for individual products or suppliers for Cooking and Reheating Temperatures.

IMPORTANT – Do not Click Next after completing your Exception Temperatures

At the bottom of the Category list is the 'Food Storage' menu item. Here you will setup all the temperature checks for your fixed Food Storage areas, e.g. Coolers and Freezers.

There are two lists to be completed:

1. Click **Equipment TempChecks**.

2. Click “+Add Storage Assets” to enter equipment to check. Enter Storage Categories by clicking “+Add Storage Category”. There is a pre-filled list of Storage Categories to speed things up, but you can add new ones of your choice using the same method as for Storage Assets. Select the sub-site to indicate where the equipment is located. Enter temperature limits.

3. Click **save**.

4. Click **next** to move to next section.

1. Storage Assets – These are the individual items, e.g. Under counter Cooler
2. Storage Categories – These are the categories, e.g. Walk-In Freezers

Repeat to add the rest of the Assets and Categories

Notes:

- If you have multiple of the same asset, but in different subsites we recommend you rename them so that it is clear on the app which you are referring too.
- At the time of writing it is not possible to edit/delete Assets or Categories

Adding Users

Now you can add the other users to your Account.

Users fall into two types

- 1. App Users – They can only use the app
- 2. Administrators – They can use the app, this configurator and the Dashboard

Add any new users as you require up to the limit for the selected Account. Details of the Account limits can be found by [clicking here](#).

The screenshot shows the 'USER DETAILS' configuration screen in the Comark configurator. The interface includes a top navigation bar with 'COMARK', 'UNITED STATES', and 'Fahrenheit' settings. A left sidebar has 'ADMIN USER' and '+ ADD USERS' buttons. The main form area is titled 'NAME SURNAME' and contains fields for Name (Another), Surname (User), Time Zone (UTC-05:00 Eastern Time (US & ...)), Prefix and phone number (+1, XXXXXXXXXXX), User Type (Administrator selected, App User), E-mail address (anotheruser@foodco.com), Password (masked), and App Pin (1234). A bottom navigation bar shows 'BACK', 'Basic Info', 'Locations', 'Checks', 'Users', 'Dashboards', and 'NEXT'.

1. Set up Admin User. Complete information for the admin user, adding Name and Surname, then using drop-down menus to select time zone and country prefix for phone. Note: When entering phone number do not use spaces. You can also set the PIN number for the app.

2. Click add users to further users. Complete information in the same as the admin user set up.

3. Click next when all the user information required has been entered.

Adding Devices

1. Devices. Set up tablets and phones to use with the app to collect your HACCP information. Click “+Add device” and enter the device name (freeform text), then select the type of device from the drop-down menu.

2. Click save to confirm details.

3. QR Code. A QR code will be generated and the first time the app is used on the device, the QR code should be scanned – see note below.

4. Click next when complete.

Note: On the first release, the Comark Kitchen Checks App is only available for Android. (The iOS version of the app is coming soon).

[Click here](#) to visit the Google Play Store

Notes:

- To add more than one Device to your Account requires that you upgrade from Professional to Business Level. Please [click here](#) to review the Business Level Account.
- You can print this page for easier scanning of the QR code. Each Tablet or Device will require its own unique QR code in order to function correctly.
- To edit or add devices, you can login in and return to this section at any time.

Nearly Finished

Now Click on **'FINISH'** to confirm that you have completed the process and ensure that the welcome e-mail is sent out to you and your colleagues.

Notes:

- You can re-visit the configurator at any time in the future to add new users or add or amend your HACCP details.
- When adding new users afterwards, always click through and click **'FINISH'** to ensure that welcome e-mails are sent.
- When you make changes via the online configurator don't forget to ask users to log out of the app on their device and select 'Refresh' in order to download the changes.

Setup is now complete

You may now start to use your Kitchen Checks PRO App and Bluetooth Pocketherm.

If you have any further questions, please refer to the Comark website by [clicking here](#)

Don't forget that you can see all of your uploaded data on your own personal Dashboard, please [click here](#) to login.

[Click here](#) to return to the section “Adding Users”

[Click here](#) to return to the section “Adding Devices”

Appendix 2 – CSV file for Uploading Products to the Configurator

The CSV is the easy way to add products to the system.

Download the CSV file from the Food Checks page or click on the paperclip below to open. Fill out the file with all the products you will receive using the app.

You can also add your in-house cooked foods by adding these to the list. There is no need to fill out the Chilled/Frozen or Ambient columns for Cooked product.

Cooked product suppliers can also be added, e.g. Main Kitchen or Function Room Kitchen if that helps you, else leave that column Blank.

Save the file locally on your PC and upload it back to the Configurator

[Click here](#) to return to the instructions.
